"Why so glum Matt?" questioned Zoe.

"I can't find my math notebook... and it is due tomorrow! I need that notebook to keep my A in math. Worse still, I don't want Ms. Wylder to think that I am irresponsible."

"Cheer up Matt! I am sure that it will turn up. In fact, I'll help you look for it. Let's make a list of all of the places it might be."

"The last place that I remember having it was at lunch, so we should start in the cafeteria."

"I have a good feeling that we are going to find that notebook," Zoe said encouragingly.

"The notebook was here, but it's not here anymore. I'll give you a clue as to where it is now, but you will have to solve some math problems first," grumbled the lunch lady Ms. Baffle.

Write each of the numbers in expanded form. The letter that goes with each answer will help you figure out the clue. The first one has been done for you.

Write each number in expanded form.

$$37,453 = \frac{30,000}{A} + \frac{\quad}{D} + \frac{\quad}{E} + \frac{\quad}{F} + \frac{\quad}{G}$$
